To determine which author names should be grouped together under a single identifier number, the Scopus Author Identifier uses an algorithm that matches author names based on their affiliation, address, subject area, source title, dates of publication, citations, and co-authors. Documents with insufficient data may not be matched, this can lead to more than one entry in the results list for the same author. By default, only details pages matched to more than one document in Scopus are shown in search results. [About Scopus Author Identifier](#)

The image shows the Scopus Affiliation search interface. At the top, the Scopus logo is on the left, and navigation links for Search, Sources, Alerts, Lists, Help, SciVal, Register, and Login are on the right. Below this is a dark blue header with 'Affiliation search' and a 'Compare sources' link. The main content area has tabs for Documents, Authors, Affiliations (which is selected), and Advanced. A search input field contains 'Lorestan University of Medical Sciences', which is circled in red. A red arrow points from a red box containing the Persian text 'وارد کردن نام دانشگاه یا سازمان' (Enter university or organization name) to the search input field. Below the input field is a 'Search Q' button. The footer contains links for About Scopus, Language (with options for Japanese, Simplified Chinese, and Traditional Chinese), and Customer Service (with links for Help and Contact us).
